

New functions in 4.0:

- Optimized for Power Macintosh (also supports 68k and 68k FPU)
- Auto-sensing and learning of EPS formats
- User configurable Weed lines
- Undo/Redo on almost all functions
- Enhanced color separation
- Document preview
- Automatic (or arbitrary) rotation of artwork to minimize vinyl loss
- Uses Apple Communication Toolbox for improved communication capabilities
- New Origin with offset between sheets
- Reduced speed at new vinyl
- A lot of new drivers including Generic HPGL, DMPL, GPGL
- Cutter status window
- Improved printing of settings for archiving jobs
- Faster and smoother background cutting with pause function

Functions:

- Optimized for Power Macintosh (also supports 68k and 68k FPU)
- Easily mirror, resize or rotate the image.
- With color separation you can select the colors you want to cut.
- Tool offset makes the cut as good as possible.
- Tool speed, acceleration and pressure can easily be set.
- With Enter text you can enter more than one line of text.
- In Cutter format you can set up how the cutter will behave.
- Check vinyl feed feeds the vinyl that will be needed this job.
- New origin after cut sets the cutter in a new starting position.
- In Create plot file the data will be sent to a file instead of a cutter.
- Revert logotype transform the active logotype into its default look.
- Reduce vinyl loss minimize the vinyl destroyed through optimizing the cut.
- Optimize cut will make the vinyl move back and forth as little as possible.
- In Partition large signs a line will be cut around each sheet to make stripping the vinyl easier.
- Support for almost all cutters.
- Overlap cutting.
- Background cutting.

System requirements:

Mac OS

A minimum of a Macintosh II with 3Mb free RAM, Harddisk and System 7 or greater. Cutline supports all Macintosh computers in colour or black and white modes; with or without maths coprocessors. Cutline is fully compatible with System 7 and is 32 bit clean.

Compability:

Cutline reads the following formats: Adobe Illustrator 7.0 and earlier, Adobe Streamline 4.0 and earlier, Adobe Photoshop 4.0 and earlier (export paths to Illustrator), Freehand 7.0 and earlier, Canvas 3.0, LetraStudio 1.5, LogoCorrector 2.3 and earlier, TypeStyler 2.0 and earlier.

Cutline is developed in Sweden by ILLOM Development. It is distributed in more than 15 countries. For more information, please contact:

SWEDEN

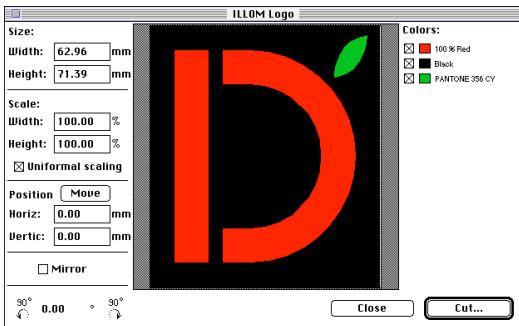

The most easy to use vinyl cutting application for the Apple Macintosh

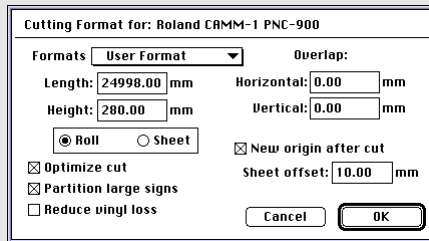

Cutting with Cutline is very simple!

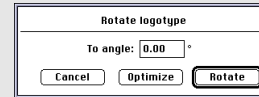

1. Open your logotype.

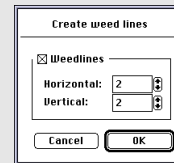

2. Enter the exact size of your finished logotype. Choose Cut...

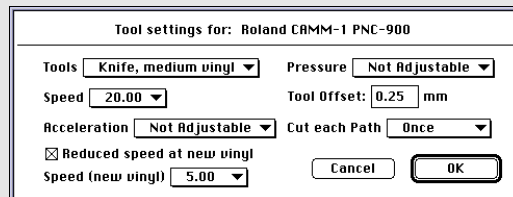

Cutter Format lets you fine-tune the behaviour of the cutter.

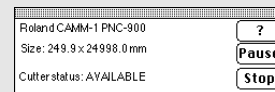

Rotate the logotype freely, or let Cutline optimize the rotation to minimize vinyl loss.

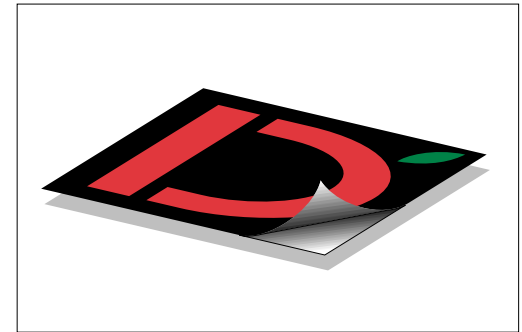

User configurable weed lines for simpler weeding of the vinyl.

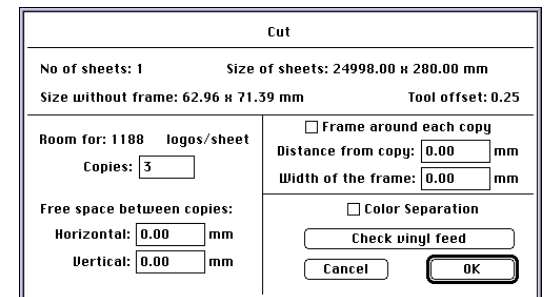

Set speed, acceleration, pressure and tool offset in the Tool Settings dialog to achieve the highest quality cut.

Monitor the cutter status in this floating window.

4. The rest is up to Cutline.

3. Enter the number of copies.
